

Characteristics of Gifted Children

Page (01)

1. Verbal ability :- Gifted children often begin communicating verbally at an early age, and their vocabulary far beyond their age. These children are often referred to as 'precocious' because of their language usage. These children often ~~use~~ choose their words carefully, but tend to use a lot of them. They can also get frustrated with children in the same age group who are unable to understand them and often turn to ~~other~~ older children for conversation.

2. High curiosity level :- Gifted children have high curiosity level and dive into subjects with a passion not seen in most children their age.

3. Memory Retention :- Gifted children are often able to retain information faster and for longer periods of time than average children of the same age. Their rapid learning ability allows them to process facts quickly and retain them for efficient recall later on. High memory retention combined with fast information processing often means these children learn subjects at a rapid-fire rate that can make it challenging for parents and teachers to present information to gifted children as fast as they like.

④ Information processing — Gifted Children often have an unusual capacity for processing information, and are often able to process that information more quickly and accurately than their peers. Bright Hub, education explains that some gifted children become disruptive in classrooms often because they are bored with the material that is taught over and over again.

⑤ Sense of Humour: — G.C. are enjoyable to be around because many exhibit a sense of humour and goes well beyond their years. These children enjoy plays on words, such as puns, and are particularly adept at using these cosmic techniques themselves. Whether their sense of humour comes out in their conversation or their writing, these students can be a joy to converse with.

⑥ Strong imagination: — G.C. often exhibit a strong imagination, with an ability to spin tales that parents and teachers do not necessarily expect. These children often show originality in their oral, written or aesthetic expression and are viewed as highly creative. G.C. may spend time ~~fant~~ fantasizing and are often categorised as independent thinkers.

⑦ Problem Solving Capabilities! - Gifted children

typically relish nothing more than breaking down a complex issues and finding a solution that no one else has every thought of. These children have an advanced cognitive and affective capacity for conceptualizing societal problems.

⑧ Keen Observation! Children who fall into

this group may have the ability to pick on details much more acutely than other children in the same ~~age~~ age bracket. Whether reading a book, watching a movie, gifted student often notice seemingly nonessential pieces of information that others might miss.

⑨ Sense of Justice G. C. often have an acute sense of justice, which can translate to high expectations of themselves and others.

While their strong moral compass can make them effective leaders and ensure good choices in many situations, this characteristic can also make it difficult for them to forge long-lasting relationships with others. These children often become interested in justice and fairness at a very early age, which continues throughout their lives.
